Figure 2-1 shows the Photoshop logo. **Figure 2-1:** The Photoshop logo is instantly recognizable. In This Chapter Touring the Photoshop workspace Creating layers Creating masks Creating files Designing a logo or creation Photoshop truly has an unlimited palette of features that enable you to make amazing images that would be impossible to create in another application. You can combine the layers of Photoshop into the stacking order that you need to create an image, keeping all of its layers in their original state. With the use of layers and masks, you can alter all of these layers at once or restrict their editing activities. Photoshop has built-in help for almost every tool and function. In this chapter, we show you how to create new layers, create masks, design a logo, and clean up images. Although this chapter is divided into several separate Photoshop topics, Photoshop has one feature, the Layers Panel, that we discuss in detail in this chapter. We have grouped some functions related to layers under one section, for ease of navigation, but some topics are kept out in the open for easy viewing. We hope that you find our tour through the various layers and masks very educational. Getting Acquainted with the Photoshop Workspace The Photoshop workspace is divided into four major sections: the Layers Panel, the Sample Image, the Layers Palette, and the Bridge window. You can move through all of these sections in any combination, but the best place to start is always with the Layers Panel. (You can see a screenshot of the Layers Panel on the facing page.) Any image in Photoshop can have layers. Think of a layer as a container that can hold any kind of information or image. You can add text or pictures to a layer to create a new layer. You can place the various pieces of a complicated image in layers, one on top of another, until the image is completed. You can even combine three or four different layers into one layer, even though one layer can never touch the other layer(s) that are superimposed on it. You can have up to 99 layers in the workspace at one time. You have to use an additional layer called the Background layer to have a 100th layer. In the illustration on the facing page, you can see seven layers (the current number of layers available). The layer on the bottom is the Background layer, and the other layers are placed atop

## What's New In Adobe Photoshop CC 2018?

Resin-ionomer cements: Is it possible to simulate the dynamic properties of one-step resin-based restorative materials? The aim of this study was to investigate the possibility of simulating dynamic properties of one-step resins using ionomer cements. Ten cements were prepared by mixing different percentages of two bisphenol A based polymeric matrices to which different percentages of 1-methacryloyloxyethyl-3-methacryloyloxy-propyl-trimethoxysilane (META) and Rhodamine B methacrylate (RB) were added. The cements were cured for 24 hours in a water bath at 37 degrees C. After that, they were immersed in water and a device was used to challenge the compressive strength. Thermocycling (1000 cycles, 5 degrees C-55 degrees C) was performed and the compressive strength was then evaluated. The marginal fit was checked in four groups (n = 10) using a stereomicroscope. A total of 200 restored and restored margins were evaluated. A one-way analysis of variance was used to determine statistically significant differences (p 0.05). However, the cement with the highest percentage of RB showed statistically significant differences in the thermocycled properties (p = 0.025). Similar properties could be achieved when simulating the dynamic properties of one-step resin-based restorative materials by using ionomer cements with two materials (META and RB) as additives.Get breaking news alerts and special reports. The news and stories that matter, delivered weekday mornings. West African nations have stepped up efforts to apprehend the presumed mastermind of a deadly ambush in Burkina Faso that killed 22 French troops, a U.N. official said Thursday. Brig. Gen. Innocent N'Dri Dones was attacked late Tuesday along with four other U.N. peacekeepers from Burundi and Togo who were driving a vehicle near the village of Tabora. The gunman targeted the French convoy, according to French and African officials. President Emmanuel Macron said earlier Thursday that the ambush was planned, and two more West African soldiers were killed in
