amazing software! exactly what you need when you've got a high performance system and want it set up to par. This app make my life easier. Big shout to devs. Nice job, this app is for recommend.. Use with caution, I used it fine up until I had to do a clean reset for my PC. Running it messed up with my USB drivers bad.. nekli el pc inik wallah zok omou. THAT THING IS

EPIC. I'm already impressed with just the free version. Haven't had any real issues from what others say on internet. What I love about this program is that it updates devices I would not think to look for and update myself such as the numerous "system devices." I think I'll manually install my nvidia driver to be safe, but other than that, I am satisfied with letting this program automatically install. If you like it, support and buy the pro.. Crashed My Computer Thank you. ed my audio drivers, now I'm stuck trying to figure out why my rear speakers are recognized as front speakers and my front, center, and sub don't work.program.. Had problems connecting to wifi after updating drivers
